THE MAKING COGNITIVE CONNECTIONS® APPROACH

Making Cognitive Connections Description

- Emphasizes the benefits of smartphone devices as memory/cognitive prosthetic devices.
- Teaches the fundamental technical skills necessary to operate a smart device while simultaneously drawing a parallel to the cognitive skills that underlie the development of those technical skills.
- Focuses on the cognitive skills required to use the device and then has the users apply those same cognitive skills to their everyday lives, making this approach practical, concrete, relevant, and transferable.

INTRODUCTION TO IOS 5

iOS 5 Topics

- Arranging Icons
- Creating Folders
- The Notification Center

Troubleshooting: Arranging App Icons

- User may not tap and hold long enough to see apps wiggle
- App may move to another screen if dragged to the edge of the screen
- App will drop wherever it is on the screen when the user lifts his/her finger

Troubleshooting: Creating Folders

- User may not tap and hold long enough to see apps wiggle
- User may drop app icon on an unintended icon, creating an unintended folder
- User may accept default folder name and it may not be appropriate

Troubleshooting: The Notification Center

- User may forget the Notification Center is available
- User may not delete the notices and may end up with too much information in the Notification Center
- User may delete a notification before it is appropriate to do so

NON-NATIVE APP DEMO

Non-Native Apps

- Memory
 - PicFrame
 - Corkulous
 - Repeat Timer Pro
 - Forgetful
 - ScreenChomp
- Time Management/Organization
 - AwesomeNote
 - PocketLists
 - Pocket Informant
- Accessibility
 - VoiceOver
 - Zoom
- Games
 - Cut the Rope
 - Where's My Water
 - Brain Challenge
 - Memory
- Speech
 - MyTalkTools
 - Speak it!
- Mental Health
 - Breathe 2 Relax
 - Mood Tracker

MAKING COGNITIVE CONNECTIONS® FOR INDIVIDUALS LIVING WITH BRAIN INJURY AND OTHER COGNITIVE CHALLENGES

The purpose of the *Making Cognitive Connections* (formerly *PDA 4 Memory*) project is to provide training materials for individuals living with brain injuries and other cognitive challenges. Training relates to the use of a smart mobile device (such as a smartphone, iPhone, iPad, or iPod Touch) as a memory and cognitive prosthetic device. The training materials include books, videos, and quick reference guides designed with the specific needs of those living with brain injury and other cognitive challenges in mind.

Organize Your Life Using IOS 5 on the iPad, iPhone, and iPod Touch

mccappreviews.com

The screenshot shows the homepage of mccappreviews.com. At the top, there is a blue header with the site's logo on the left, the text "App Reviews to help those with brain injuries and other cognitive challenges" in the center, and "An ID 4 the Web Project" on the right. Below the header is a navigation menu with links for Home, Listing, Reviews, Add Listing, Users, Register, and Advanced Search. The main content area is divided into several sections: "ID 4 The Web: App Reviews -- Mission" with a paragraph explaining the site's purpose and a note about moderation; "Top Rated Apps" featuring a review for "Great Brain Game" with a 5-star rating and a helpfulness indicator; "My Account" with a login form and a "Register Now" link; and "Categories" listing various app categories like Business/Productivity, Calendar/Time Management, Education/Study Skills, and Finance.
